- Repels all insects
- It is free from toxic and solvent residue
- Completely eco - friendly for all kinds of crops

## Custom Enzymes Pest Repellant

A novel formulation that is effective against the desert and migratory locust species and other local insects after a single spray treatment.

### Applications and Benefits

Traditional methods for controlling locusts involves spraying chemicals often from aircraft that can cause further problems rather than just the swarm, due to persistence in the environment, bioaccumulation in the food chain or damage to animal and marine life. A novel formulation that is effective against the desert and migratory locust species and local insects after a single spray treatment. This herbal formulation can be used as a strong repellent agent against a wide range of insects such as Aphids, Beetles, Grasshoppers, etc., without affecting the ecosystem

## Product Details

### Dosage
